

**APPENDIX 6 – Bodies at the IML**  
**Bodies in the IML at the time of Henri Paul’s autopsy**

**September 1st**

972104      972122      972125

**September 2nd**

972055      972067      972099      972113      972121      972134  
972135      972139      972140      972141      972142      972143  
972144      972145

**Total 17**

All the above 17 were definitely in the mortuary at the time of Henri Paul’s autopsy. There are, however, eight numbers missing from the list for that period - 972148, 972149, 972153, 972155, 972156, 972157, 972158 and 972159. The allocation system is numerically based; therefore, all autopsies prior to Henri Paul must have been present. It is, however, possible that some of the other eight arrived in the mortuary early on August 31st, but were not reported.

It is also possible that Dodi and Henri’s numbers were swapped with two of the above, which would account for Commander Mulès’ mixing up the body numbers.

There is no name recorded for body number 972140, even though height, weight and the doctor (Vorhauer) appear against that number.
